PROFESSIONAL EXPERIENCE

Arya Noble Jakarta, Indonesia

iOS Developer **March 2026 – Present**

- Develop and maintain Erha Buddy within a 2-person iOS team, supporting 222K total production installs and an opt-in cohort averaging 39.98K monthly active users, while contributing to technical design, sprint planning, estimation, code reviews, and cross-functional collaboration with Product, Business Analyst, Design, QA, and Backend teams.
- Re-engineered registration and guest-user journeys by enabling guest cart, address, checkout, and telemedicine access; adding context-aware login gating; and streamlining account creation with centralized validation, phone-number handling, and optional KTP scan/autofill. Post-release analytics showed a 98.1% quarter-over-quarter increase in average daily cart checkout intent.
- Implemented layered API integrity protection across 223 eligible internal app API endpoints, combining HMAC request signing (canonical paths, query parameters, payloads, nonce, timestamp, and signature headers) with Apple App Attest (backend challenges, Keychain-backed device keys, and per-request assertions), including version-gated rollout and HMAC fallback for unsupported devices.
- Redesigned checkout across 3 flows: combined product and treatment orders, teleconsultation, and Flash Sale, using server-issued quoteId submission to reduce client-side price tampering; added real-time SSE updates, deep-link routing, stock-aware quantity validation, promotional pricing, cart synchronization, and analytics tracking.
- Ensure stable and reliable iOS releases while maintaining 99.82% crash-free users through Firebase Crashlytics, App Store Connect analytics, TestFlight, phased releases, and post-release performance tracking.

4TITU PTE LTD Singapore, Singapore

Fullstack Developer **August 2025 – February 2026**

- Engineered an end-to-end order management system with intelligent email automation, cutting manual processing time by ~80% for multi-outlet restaurants.
- Built a 3-level unit-of-measure (UOM) conversion engine (Package, Secondary, Base units) to ensure accurate stock tracking across operational contexts.
- Delivered internationalization feature (i18n) supporting three languages (English, Chinese, Malay), enabling system adoption across Southeast Asia (Singapore, Indonesia, Malaysia).

Apple Developer Academy Batam, Indonesia

iOS Developer **February 2025 – December 2025**

- Developed 6 iOS applications in a 10-month intensive program across 6 cross-functional teams, integrating with various APIs, including 2 App Store releases for Paintee (beginner-friendly face painting guidance) and SLNG (Indonesian slang translator for foreigners, 100+ downloads).
- Performed iterative usability testing directly with 50+ users across low-fidelity, mid-fidelity, and MVP prototypes, validating interaction flows and usability assumptions.
- Unified data management across 4 app extensions using App Groups and SwiftData, leading to a 40% reduction in code duplication and improved code maintainability across projects.

EDUCATION

Yogyakarta State University Yogyakarta, Indonesia

B.Eng. in Information Technology | GPA 3.84/4.00 (Cum Laude) **August 2021 - February 2025**

SKILLS

Languages & iOS SDK: Swift, UIKit, SwiftUI, SnapKit, Lottie, SkeletonView, XIB

Architecture & Design: MVVM, Clean Architecture, Modularization, SOLID Principles

Networking & Data: REST APIs, Alamofire, Moya, Server-Sent Events, RxSwift, Realm, UserDefaults, RxMoya, RxReachability, ObjectMapper

Platform & Integrations: Firebase Crashlytics, Firebase Remote Config, MoEngage, Qiscus, Push Notifications, Deep Links, Realtime Database

Security: Apple App Attest, DeviceCheck, Keychain, HMAC Request Signing, RSA Encryption, Certificate Pinning

Tools & Delivery: Git, GitHub, Bitbucket, GitHub Actions, Postman, Docker, Figma, GitKraken, FLEX, Netfox, App Store Connect, TestFlight
